BuyWise Project Overview

1. Project Objectives

1. Enhance User Experience:

  - Develop a user-friendly interface that simplifies the online shopping process, making it accessible and intuitive for all users.

2. Offer Competitive Pricing:

  - Provide a wide range of products at competitive prices to attract and retain customers, ensuring value for money.

3. Ensure Secure Transactions:

  - Implement robust security measures to protect user data and ensure safe and secure transactions on the platform.

4. Support Small and Medium Businesses:

  - Create opportunities for small and medium-sized businesses to reach a broader audience by offering them a platform to showcase their products.

5. Scalability and Flexibility:

  - Design the system architecture to be scalable and flexible, allowing for future expansion and integration of new features as needed.

6. Efficient Order Management:

  - Develop an efficient order management system that streamlines the process from product selection to delivery, enhancing customer satisfaction.

2. Team Members

- **Ehab Sadiq Fawzy**: Leader of the entire project & Back-end Development
- **Mazen Shreef Mohammed**: Database designer and implementer
- **Ahmed Ashraf abd El badee3**: Front-end Development
- **Hazem Khaled Ali**: Front-end Development & Database Implementer
- **Demian Wafik Jadallah**: Front-end Development
